/***************************
Name: Shubham Satish Tembhurkar
PRN: 1641060
Class: L.Y.B.TECH.
Batch: B1
Sub: CCL
Aim: Write a C program to check whether a string belongs to grammar or not.
***********************
PROGRAM 1:
#include<string.h>
#include<stdio.h> int main() {
int c; char string[20]; int
state=0,count=0;
//printf("\n The string must begin with a and terminate with b"); printf("\n The Given Grammar is:\n");
printf("\tS->aS \n\tS->bR \n\tR->aR \n\tR->bS \n\tR->b\n"); printf("Enter a String To
Be Checked: "); scanf("%s",string);
while(string[count]!='\0')
  switch(state)
  case 0: if (string[count]=='a')
              state=1;
else
              state=3;
break;
  case 1: if (string[count]=='a')
                     else if(string[count]=='b')
              state=2;
else
              state=3;
                break;
  case 2: if (string[count]=='b')
              state=2;
       state=3;
else
                      break;
  default: break;
 count++; if(state==3)
 break;
} if(state==2)
printf("\nString is
accepted.\n"); else
                  printf("\nString is not accepted.\n");
```

return 0;

}

OUTPUT:

```
The Given Grammar is:

$ 2-35  
$ 3-30  
R -300  
R -300
```

PROGRAM 2:

#include<stdio.h> #include<string.h> int
